## Managed SD-WAN Secure Enable secure high-performance global connectivity

Product Sheet: Managed SD-WAN Secure

Businesses are choosing SD-WAN to transform their corporate networks. As a pioneer in software-defined networking with over two decades of innovative leadership, Masergy built a global SD-WAN solution to deliver a better application experience for employees, reduce operating costs, and simplify operations at the WAN edge—all as a globally-available managed service.

#### Secure SD-WAN with guaranteed performance

Masergy Managed SD-WAN Secure is built for security and agility. Powered by industry-leading Fortinet® hardware, Masergy's Managed SD-WAN Secure solutions empower you with scalable business connectivity options.

Gartner coined the term Secure Access Service Edge (SASE) to describe the convergence of WAN connectivity with advanced cybersecurity functions. Bundle SD-WAN connectivity with cloud-delivered security for branch offices and onsite hardware with next-gen firewalls for large offices—all with end-to-end analytics from a single pane of glass customer portal.

Security never means you sacrifice performance. Our service level agreements (SLAs) are trailblazing in the industry, with 100% uptime for all high availability-configured Masergy SD-WAN Secure sites, 100% cloud service reachability for AWS, Azure, and 200+ providers, along with an industry-leading 5-minute proactive outage notification. And if we fail to meet those SLAs, we proactively credit your account.

Managed SD-WAN built for high performance

# **Benefits**

 Create a secure and agile corporate network using Masergy's global platform

COMCAST

**BUSINESS** 

MASERGY

- Empower branch offices and remote employees with 100% uptime and automatic optimization for over 5,000 business-critical apps such as Microsoft 365, Oracle, Salesforce, and more
- Reduce cybersecurity risks with cloud-native security controls built on Gartner's secure access service edge (SASE) principles that scales with your business needs
- Simplify management and centralize visibility for your entire network from a unified AI-enhanced portal

Product Sheet: Managed SD-WAN Secure

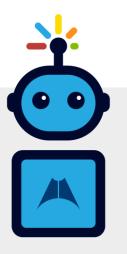

# One portal for real-time visibility & control

The Masergy customer portal delivers a single pane of glass view over your Managed SD-WAN Secure deployment. A customizable dashboard displays your global network, SD-WAN devices, and clouds along with important security alerts and analytics.

## **AI-enhanced network optimization**

Masergy AlOps, the industry's first artificial intelligence-powered network optimization solution, is embedded into every SD-WAN deployment to enhance your app performance, predict bandwidth needs, and troubleshoot issues faster than humanly possible from inside the portal.
